Subject: 465044 ESKOM Cashan Substation and Powerline
Attachments: 465044_2014_05_26_Amended_data_Affected_Adjacent.pdf

Dear Peter

Following our telephonic conversation herewith a brief summary of the project and attached map.

Eskom is currently trying to decrease the pressure exerted on other power stations by supplying additional substations to areas in need and supplying electricity to areas with increasing electricity demand in the North West and Gauteng Province.

The proposed project includes the construction of a substation in Cashan and a powerline to the existing Hekpoort substation. The proposed Cashan substation falls within the Gauteng province, North West of Krugersdorp and is intended to alleviate the pressure exerted on Eskom in the area for increased power supply and to attempt to ease pressure this increased power supply is exerting on other power stations.

The proposed Cashan substation will be connected to the existing Hekpoort substation via a 132KVA powerline which runs approximately 9 km in a North Easterly direction from Cashan into the North West Province. Figure 1 shows the location of the substation and powerline. Please see map
