

No	Name	Long	Lat	Description	Remarks	Significance	Rating
1	ORR 001	30° 8' 39.00" E	24° 38' 46.00" S	This site is an example of historic exploration trenches from the 1920s. This site is one of many trenches that are found across the study area.			5
2	ORR 002 E	30° 8' 51.00" E	24° 38' 42.00" S	This site is situated on a flat plateau lying lower than the proposed, flagged road on the northern side of the hill.			3
3	ORR 002 W	30° 8' 40.00" E	24° 38' 43.00" S	Although only one grave could be identified within site, more will definitely be encountered during more detailed study. Cultural remains indicate that the site dates at least the pre 1900's			4
4	ORR 003	30° 8' 21.00" E	24° 38' 41.00" S	The site is situated on the foot of the western side of the hill where the proposed reef road starts. An informant stated that the family Mogale stayed here during 1964-1969 when the owner was forcefully removed. There is a good possibility of graves being found in this area.			
5	MMR 001	30° 6' 39.00" E	24° 34' 33.00" S	The site is located on the highest part of the saddle between hill 1 and hill 2. several structures like huts, grainbin storage huts, livestock pens and lapa floors were also identified from the remains.. The site has many features similar to the one found on the ORR 002. The similarities indicate an occupation of pre 1900, although not enough ceramic evidence were recovered to proof this.			3
6	MMR 002	30° 6' 40.00" E	24° 34' 26.00" S	This site is located approximately 150 m North of MMR 001 in a lower part of the saddle between hill 1 and hill 2. Six dilapidated structures were identified and they formed a closely organised family unit. One grave was identified on the western side of the complex, approximately 5 m from the road, another grave was identified to the east of the complex approximately 2 m from the road. The site is not as old as MMR 001 and the building style and structures indicate an occupation within the last 50 years.			5
7	MMR 003	30° 6' 39.00" E	24° 34' 43.00" S	Three kraals were identified next to each other on the South side of the mountain, next to the road. One dilapidated hut structure was identified next to the most eastern kraal. One grinding stone was also found here. The site was approximately 70 m X 15 m and lay South-east to north-west. It seemed to be of recent origin and might still be in use.			5
8	MMR 004	30° 6' 40.00" E	24° 34' 53.00" S	Stonewalled terracing that formed part of MMR 003. It also seemed to be of recent origin			5
9	MOR 001	30° 8' 11.00" E	24° 38' 28.00" S	This site is located in the valley where the proposed road will run through. The remains of dilapidated structures indicate the site. Seveve possible graves were also identified in the close proximity of the structures.			
10	OWR 001	30° 8' 10.00" E	24° 39' 17.00" S	Medium to dense scatters of stone tools were identified in a series of dongas next to the proposed road. Potsherds were also found in the dongas, but they were most probably washed down from the recently abandoned Bapedi sites higher up the slope.			
11	OWR 002	30° 8' 2.00" E	24° 39' 26.00" S	A cluster of graves was identified approximately 30 m west of the road. It consisted of at least 10 graves with stonewall enclosure			
12	OWR 003	30° 7' 59.00" E	24° 39' 44.00" S	Another cluster of four graves was identified next to a wild fig tree approximately 30 m west of the road just before the road turned sharply west itself			
13	OWR 004	30° 8' 1.00" E	24° 39' 30.00" S	Photo 27 & 28			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
14	OWR 005	30° 7' 42.00" E	24° 40' 7.00" S	Residential structures made from clay or stone. A middle stone age tool was found at this location at the time of the survey.			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
15	OWR 006	30° 7' 54.00" E	24° 40' 8.00" S	Residential structures made from clay or stone.No findings were found at the time of this survey			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
16	OWR 007	30° 08' 22" E	24° 41' 13" S	Two graves were found 10 m from the road. These graves could most probably be connected to some of the abandoned homesteads in the area.Graves (high importance)			
17	OWR 008	30° 8' 32.00" E	24° 40' 43.00" S	Residential structures made from clay or stone			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
18	OWR 009	30° 8' 24.00" E	24° 40' 57.00" S	Residential structures made from clay or stone			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
19	OWR 010	30° 8' 21.00" E	24° 41' 4.00" S	Residential structures made from clay or stone			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
20	OWR 011	30° 8' 22.00" E	24° 41' 13.00" S	Residential structures made from clay or stone			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
21	OWR 012	30° 8' 24.00" E	24° 41' 22.00" S	Residential structures made from clay or stone			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
22	OWR 013	30° 8' 38.00" E	24° 41' 41.00" S	Photo 34			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
23	OWR 014	30° 8' 43.00" E	24° 41' 37.00" S	Photo 35			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
24	OWR 015	30° 8' 45.00" E	24° 41' 37.00" S	Photo 36 & 37			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
25	OWR 016	30° 8' 58.00" E	24° 41' 47.00" S				5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
26	OWR 017	30° 9' 8.00" E	24° 42' 30.00" S				5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
27	OWR 018	30° 9' 15.00" E	24° 42' 33.00" S				5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
28	OWR 019	30° 9' 15.00" E	24° 42' 44.00" S				5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
29	OWR 020	30° 9' 33.00" E	24° 42' 46.00" S	Photo 38 & 39			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
30	OWR 021	30° 9' 37.00" E	24° 42' 46.00" S				5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
31	OWR 022	30° 9' 45.00" E	24° 42' 47.00" S	An area covering approximately 80 m X 80 m on the northern side, right next to the road. The site is isolated and away from other previous occupied areas. The meaning of this site is not yet known but it could possibly be an initiation site.			
32	OWR 023	30° 10' 20.00" E	24° 43' 26.00" S	Photo 40			5 & 6, Due to its recent origin from within the last 50 years, these sites have very little archaeological value
33	MAR 001	30° 6' 52.00" E	24° 35' 16.00" S	A rather recent occupational area was identified on the western side of the donga. One grave was identified on the eastern side of this homestead			5 & 6 Low archaeological value
34	MAR 002	30° 6' 49.00" E	24° 35' 18.00" S	An occupational area was identified on the western side of the donga. Some pieces of stonewalling were visible, but in a very dilapidated state			5
35	V01 - 01	30° 9' 47.04" E	24° 42' 44.46" S	Square outer wall of homestead with massive entrance posts	Remains of a homestead
