AFFECTED PARTIES						
Landowner/s						
Section 21 Company	X	Mr Johannes Tlokoane	08-Sep-17	Mr Johannes Tlokoane asked if there will be additional jobs created for this project	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts associated with this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Finalised
	X	Mr M Mabilo	20-Sep-17	Mr Mabilo asked MPM as to why are they only applying for a small portion for the Doornbosch project, is it not a delaying tactic because they will want to ask for more in future	MPM is only including the approved Doornbosch Mining Right into the existing and approved MPM Mining Right by undertaking a Section 102 amendment process in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), and application in terms of the Regulations for listed activities in terms of the National Environmental Management Act, 1998 (Act No 106 of 1998) (NEMA). The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme.	Finalised
Samancor	X	Elsie Mashishi	Awaiting comments	Not available to attend the meeting, but was provided with letters, registration forms and BID's.	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Hwashi- Difagate Community Trust	X	Mr Moses Makwana	24-Aug-17	Mr Moses Makwana requested to have a one to one meeting with the EAP to discuss the landowners' project concerns.	SRK welcomes an opportunity to further discuss the project, and contacted Mr Makwana to schedule a meeting. The meeting was held at MPM on 8 September 2017.	Finalised
	X	Mr Moses Makwana	08-Sep-17	Mr Makwana asked SRK and MPM if there are any plans for communities to benefit from this project	SRK thanks you for your comments as received during the project announcement phase of this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five-year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018. Some of the community projects funded by MPM include the sewing factory and an engineering workshop. The programs include progressive approaches to improving local participation in employment and procurement. Contractors, for example, are required to enter into joint ventures with local companies for at least 30% of a contract where appropriate. Contractors must also ensure that they employ local community members on their teams.	Finalised
Traditional Authorities						
Matimatjati Traditional Authority	X	Kgoshi Joseph Nkosi	Awaiting comments	Not available to attend the meeting. They were provided with letters, registration forms and BID's.	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Diphale Community	X	Kgoshi Masia Mohlala	20-Sep-17	Kgoshi Masia Mohlala asked MPM as to why don't they employ at least one person per community because the communities are going to rebel if they are not hired in this project	SRK thanks you for your comments as received during the project announcement phase of this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five-year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018. Some of the community projects funded by MPM include the sewing factory and an engineering workshop. The programs include progressive approaches to improving local participation in employment and procurement. Contractors, for example, are required to enter into joint ventures with local companies for at least 30% of a contract where appropriate. Contractors must also ensure that they employ local community members on their teams.	Finalised
Maroga Community	X	Kgoshi Sidwell Maroga	Awaiting comments	Not available to attend the meeting, but was provided with letters, registration forms and BID's.	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Mpuru Community	X	Kgoshi Emmanuel Mpuru	Awaiting comments	Not available to attend the meeting, but was provided with letters, registration forms and BID's.	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Sehaku Community	X	Kgoshi Isaac Kgwete	Awaiting comments	Not available to attend the meeting, but was provided with letters, registration forms and BID's.	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.

Seuwe Community	X	Kgoshi Bethuel Mohlala	20-Sep-17	Kgoshi Bethuel Mohlala asked why is MPM not hiring whereas they are extending the underground workings	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts associated with this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Finalised
Mamphahlane Community	X	Kgoshi Ralph Kgoete	Awaiting comments	Not available to attend the meeting, but was provided with letters, registration forms and BID's.	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Municipal councillor						
Councillor Ward 2	X	Cllr. P. Makine	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Municipality						
Fetakgomo –Tubatse local Municipality	X	Mr. NP Busane	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
#REF!	X	#REF!	04-Sep-17	Mr Philemon Mphahlele requested an electronic copy of the DSR, and to address all future correspondence to the secretary of the Municipal Manager.	SRK will address all future correspondence to the requested person, who was provided with an electronic copy of the DSR.	Finalised
Fetakgomo Local Municipality	X	Mr Andris Lesufi	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Organs of state						
Department of Water and Sanitation	X	Adam Ramalisa	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Department of Rural Development and Land Reform	X	Mr Tinyiko Makamu	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Department of Agriculture	X	Mr Willie Moeng	04-Sep-17	Mr Ntsoane Sereme requested an electronic copy of the DSR.	SRK thank Mr Ntsoane Sereme for his request, and an electronic copy of the DSR was provided as requested.	Finalised
Cooperative Governance, Human Settlement and Traditional Affairs	X	Mr Ntsoane Sereme	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
Department of Mineral Resources	X	Mr Thivhulawi Kolani	Awaiting comments	None received to date (4 October 2017)	To be addressed if/when received	Further stakeholder consultation to take place during the EMP phase.
LDEDET	X	Mr Victor Mongwe	04-Sep-17	The EAP was notified that Mr Mthombeni RV will represent LDEDET on the application.	Comment Noted. SRK will address all future correspondence to Mr Mthombeni.	Finalised
OTHER AFFECTED PARTIES						
INTERESTED PARTIES						
Interested Party		Mr Amos Malose	11-Sep-17	Mr Malose phoned and said that he is interested in the project, so he requested to be included in the database	SRK thanks Mr Malose for his participation. SRK included him in the database, and Mr Malose will be included in future correspondences	Finalised
Interested party		Miss Thapedi Veronica Moroa	18-Sep-17	Modikwa is a big company in Sekhukhune in which it doesn't benefit us with anything that we need like water, electricity, roads even with jobs. It is very sad because communities suffers a lot, because they are not working. Its been long when Modikwa operates but it doesnt bring any changes in our community, I hope this coming shaft will bring changes in our community, roads will be fixed, we will get proper jobs, children will get learnerships and many jobs will be created. This land needs more things like building halls and many things, we hope and be faithful that this shaft will bring more changes to our communities. People in our community doesnt even work because of not working, and providing their our families. Many children went to terteries and they are sitting at home because of not finding work, because of Modikwa not employing them, its been long because is the responsibility of Modikwa to train children from the community, hope this will be heard.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts associated with this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. List the names of persons consulted in this column, and mark with an X where those who must be consulted were in fact consulted.					
Interested party	Ms Miemie Mabilu (ANC)	18-Sep-17	<p>I put my comment in a very sad way, because last time I check Modikwa is the biggest mine situated in Sekhukhune and have many shafts. Sadly Modikwa doesn't care about the communities around but only loot the mineral in our communities and in our land. The communities doesn't even benefit on it. We don't have proper roads, water and many things which the company could do to these communities. Children of this land are not working, and it's very sad to experience this in our land while the big mine is situated in our place. We want to see changes in our community. I hope this shaft will benefit us, we want this company to establish bursaries to the community, we want learnership, we want proper roads, water and halls. And also provide more jobs to us</p> <ol style="list-style-type: none"> 1. We would be grateful if you could expose our community to training; 2. Which processes are you intending to put in place to expose community to training? 3. As the section 21 community, we would love to see the mine cooperating with us by training local people; 4. We would appreciate if your processes could be fair and transparent; and 5. We would cooperate with the mine if we can get support from the mine and creation of job opportunities. 	<p>SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts associated with this project. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018. Contractors must also ensure that they employ local community members on their teams.</p> <p>SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts or new/additional job opportunities associated with this project. MPM indicate that they have a policy to recruit locals for any available skill/s while allowing the additional skills from outside the affected area to ensure business stability. Recruitment will follow the current procedure in place established in consultation with community representatives in case there is arising need of additional skills during the project implementations phase. SED process will be followed.</p>	<p>Comment Addressed. Further stakeholder consultation to take place during the EMP phase.</p> <p>Comment Addressed. Further stakeholder consultation to take place during the EMP phase.</p>
Interested party	Mr Tumelo Ernest Thotse (Ma)	18-Sep-17	<p>I believe that the Doornbosch mining right and consolidate the Modikwa Platinum Mines environmental management programme will offer the entire youth the great opportunities and also to eradicate poverty within communities of Maandagshoek. The extension of existing Modikwa platinum mine south 2 shaft operational its a developmental needs within communities. We are really appreciate the well done by Modikwa platinum mine for extending shaft. Hope you will consider and prioritise the worker's safety and skill development. I thank you</p>	<p>SRK thanks you for your comments as received during the project announcement phase of this project. Interested party	Mr Mapitsi Hendrick Kgwetlane	18-Sep-17	<p>I would like MPM to grow on and on. I would love Modikwa to get more ground so that people get work as much as possible. The more MPM gets land to mine the more people of surrounding areas will get jobs and MPM will make more money to develop the communities around the mine. As MPM grow, management must stop playing games when coming to the development of the communities. People need to be given skills. They play wrong know that it is going to be more difficult for the mine to develop, because communities are going to resist to give them space to do so. MPM must learn from the wrongs done in the past. Please make sure of that. Deliver as per the promise made. Do not take advantage of poor people. People here know much, try not to cheat as they will help</p>	<p>SRK thanks you for your comments as received during the project announcement phase of this project. Interested and Affected Parties	Names	Date Comments Received	Issues raised	EAP's (SRK's) response to issues as mandated by the applicant	Consultation Status (consensus dispute, not finalised, etc)
List the names of persons consulted in this column, and mark with an X where those who must be consulted were in fact consulted.					
Interested party	Ms Tshepiso Mabilu	18-Sep-17	As an individual I really don't understand the whole document, I think you should have come to the community and explained everything on the paper	SRK thanks you for your comments as received during the project announcement phase of this project. SRK welcomes and opportunity to further explain the project, and contacted Ms Tshepiso Mabilu telephonically to discuss. Mr Mabilu stated he will refer to the Draft Scoping Report, but he still had concerns about other community members who would not be able to read and understand the report and felt that it would be better to engage them on an open forum. Further stakeholder consultation will also be undertaken throughout the development of the EIA/EMP document.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Philemon Dimpho Ngwatle	18-Sep-17	We are people with disabilities, we have realised that private sector do not recognise us. We hereby following the employment equity Act no 55 of 1998 outlines the policies that enable people with disabilities to have their rights recognised in the labour market. We want to be accommodated with office where our rights can be accessible. We want to be included in	SRK thanks Mr Philemon Ngwatle for his comment. MPM indicated that the mine does not discriminate against people with disabilities when employment opportunities are available. Modikwa currently have 8 employees with disabilities that have been declared, and encourage applications when appropriate opportunities become available.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Speed Kgwetiane	18-Sep-17	It is a good idea as it will allow Modikwa mine to employ more people, more especially those who are residing around the mine.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts or new/additional job opportunities associated with this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Alfred Ngwatle	18-Sep-17	I think you have to come to the community first to get full information because some things we can only say it not write them. We have to ask you some few question before we can agree on this explanation	SRK thanks you for your comments as received during the project announcement phase of this project. SRK welcomes and opportunity to further explain the project, and contacted Mr Alfred Ngwatle telephonically to discuss. Mr Alfred Ngwatle stated he will refer to the Draft Scoping Report. Further stakeholder consultation will also be undertaken throughout the development of the EIA/EMP document.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Malakai Mabilu	18-Sep-17	If his thing is going to affect us as community then the mine must come to us to hear our views because we can not state everything on the paper	SRK thanks you for your comments as received during the project announcement phase of this project. SRK welcomes and opportunity to further explain the project, and contacted Mr Malakai Mabilu telephonically to discuss. Mr Malakai Mabilu stated he will refer to the Draft Scoping Report. Further stakeholder consultation will also be undertaken throughout the development of the EIA/EMP document.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Christopher Mabilo (ANC)	18-Sep-17	The mine must use fair recruitment system that will ensure that all the affected people get employed. There must be a skills development programmes that will empower the local youth with mining skills	SRK thanks you for your comments as received during the project announcement phase of this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018. Some of the community projects funded by MPM include the sewing factory and an engineering workshop. The programs include progressive approaches to improving local participation in employment and procurement. Contractors, for example, are required to enter into joint ventures with local companies for at least 30% of a contract where appropriate. Contractors must also ensure that they employ local community members on their teams.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Moopa David Manyaka	18-Sep-17	I am grateful for the opportunity given to me. I would like to serve as a member of Modikwa Platinum Mine's Environmental Management Programme	SRK thanks you for your comments as received during the project announcement phase of this project. The comment is noted. There is no membership opportunities to MPM's Environmental Management Programme (EMP), as the EMP is a legal document that details MPM's environmental management and monitoring requirements. The EMP is not a forum/committee that has membership associated therewith. Mr Moopa David Manyaka was contacted telephonically to discuss the project.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Ms Etumeleng Raesetje Madi	18-Sep-17	I wish to express my fear and warning that a merger between Modikwa and Doornbosch would result in a conflict. There are seven (7) traditional communities around Modikwa and Doornbosch also has its own traditional communities. What do you think would prevail out of such a merger? I foresee a huge strike from local communities which are suffering as a result of unemployment, a cause for concern at the moment. To resolve this, I call upon Modikwa Mine to train local people who would be absorbed by the mine during the merger. In that manner this envisaged conflict would be resolved and there won't be any trouble whatsoever. Those are my comments.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no mergers associated with this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.

List the names of persons consulted in this column, and mark with an X where those who must be consulted were in fact consulted.					
Interested party	Ms Daisy Lethabo Morole	18-Sep-17	We express our gratitude to Modikwa and Doornbosch Mines and call upon them for tolerance and cooperation. We further appeal for cooperation between the two mines and communities as well as their traditional leaders. Unemployment is the major cause for concern facing our communities. Local communities are overlooked when recruiting employees into the mine. When coming to employment, preference is given to outsiders/strangers at the expense of local communities. We call upon the mine to address this challenge. Local communities should be afforded training opportunities to shape their future for the better and sustain their livelihood. The major concern facing the country is lack of employment opportunities. We look forward to Modikwa and Doornbosch playing a critical role in addressing this challenge by absorbing local communities. I rest my case.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no mergers between mining companies being undertaken, nor will there be new/additional job opportunities associated with this project. The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018. Some of the community projects funded by MPM include the sewing factory and an engineering workshop. The programs include progressive approaches to improving local participation in employment and procurement. Contractors, for example, are required to enter into joint ventures with local companies for at least 30% of a contract where appropriate. Contractors must also ensure that they employ local community members on their teams.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Ms Stanza Mabilu	18-Sep-17	In my opinion, an ad hoc committee should be established to facilitate the merger between Modikwa and Doornbosch mines. I don't think it is possible to work with other mining-houses before the merger with Doornbosch mine is concluded.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no mergers between mining companies being undertaken, nor will there be new/additional job opportunities associated with this project. The existing Doornbosch Mining Right is being included into the existing MPM mining right area through a Section 102 process in terms of the MPRDA.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Thapelo Mabilu	18-Sep-17	We, community members, do not approve the procedure you embarked upon of engaging with communities. We request the mine representatives to come to the community and explain this concept document.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK welcomes and opportunity to further explain the project, and contacted Mr Thapelo Mabilu telephonically to discuss. Mr Thapelo Mabilu stated that he takes note of the information provided, but that he did not know anything about the project until the phonecall. It is possible that someone used his contact information on the response sheet. Stakeholder engagement is undertaken throughout the authorisation process. Further engagement through means of a focus group meeting will take place during the development of the Environmental Management Programme.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Siphon P Madingwane (Mac)	18-Sep-17	I agree with the proposed amendments on condition that there is going to be community engagements with all local communities henceforth. The major concern is the engagement of all interested and affected parties (I&APs). Most significantly is the commitment by the mine to service communities with the projects mentioned so that local businesspeople could benefit from opportunities that would avail themselves. We would also be grateful if the mine can construct a processing plant, a smelter and refinery. Small entrepreneurs should be given business opportunities instead of well-established businesses. By so doing, the mine will be contributing towards its own growth.	SRK thanks you for your comments as received during the project announcement phase of this project. Stakeholder engagement is undertaken throughout the authorisation process. Further engagement through means of a focus group meeting will take place during the development of the Environmental Management Programme. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five-year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018. Some of the community projects funded by MPM include the sewing factory and an engineering workshop. The programs include progressive approaches to improving local participation in employment and procurement. Contractors, for example, are required to enter into joint ventures with local companies for at least 30% of a contract where appropriate. Contractors must also ensure that they employ local community members on their teams. Further engagement through means of a focus group meeting will take place during the development of the Environmental Management Programme.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Edward Moropa (ANC)	18-Sep-17	Any procedure put in place for the recruitment of the employees is welcome. I am desperately in need of employment.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no new shafts or new/additional job opportunities associated with this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Ms Mapheto Mohlalamorudi	18-Sep-17	We call upon the representatives of the two mines and an independent consultant to meet with the community. As the community, we do not know if there is role played by committees in the implementation of the project. We would like you to come and introduce yourselves officially by convening a community meeting because we do not understand this document. Please let's come and talk and stop communicating with us with pamphlets/documents. If you do not take us seriously and ignore this humble request, we are going to take legal steps against you and you will end up accusing us being	SRK thanks you for your comments as received during the project announcement phase of this project. Stakeholder engagement is undertaken throughout the authorisation process. Further engagement through means of a focus group meeting will take place during the development of the Environmental Management Programme. Ms Mapheto Mohlalamorudi Morudi was contacted telephonically, and a voicemail was left.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.

Interested party	Mr Collins Moraba (ANC)	18-Sep-17	I suggest that the mine put in place transparent ways of recruiting employees in the community.	SRK thanks you for your comments as received during the project announcement phase of this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. 65% of employees from Modikwa are from local areas. A recruitment policy is followed when selecting the suitable candidates for the mine whenever job opportunities are available. MPM will follow the current leadership program and recruitment policy as well as bursaries for the specific fields of study. No changes are envisaged to the current procedures.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Elmon Thabiso Lekwadu	18-Sep-17	We request that the recruitment of employees should be done in consultation with the community, just like the mine did by affording communities the opportunity of making comments.	SRK thanks you for your comments as received during the project announcement phase of this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. 65% of employees from Modikwa are from local areas. A recruitment policy is followed when selecting the suitable candidates for the mine whenever job opportunities are available.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Hlompho Keith Madingwar	18-Sep-17	The environmental authorisation process requires engagement with communities (public participation live). Amending the Environmental Management Programme should be inclusive of all other components such as social labour plan review. It is crucial that we comply with the laws. Section 102 of the minerals that Doornbosch Mine applies does not assist communities at all. We need the implementation of section 104 which entitles communities to extract the minerals/ore which the mine is not licensed to extract them in terms of the MPDRA of 2002. The allocation of shares should also be reviewed. Currently communities have 17 percent only, this percentage needs to be increased. The mine must comply with section 23 of the Mine Waste Solution (MWS) which regulates the extraction of minerals and other legislation such as the Minerals and Petroleum Resources Development Act 28 of 2002 (MPDRA). We want proper consultation and not fake or propaganda.	SRK thanks you for your comments as received during the project announcement phase of this project. In South Africa, distinction is made between surface land ownership and mineral ownership. The state is the custodian of the mineral resources of South Africa. The rights to access and mine the minerals beneath the surface is managed by the state through the Department of Mineral Regulation (DMR) through the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA). MPM is the current Mining Rights holder in terms of Section 22 of the MPRDA. The MPRDA does not allow two separate companies/entities to hold Mining Rights for the same minerals over the same geographical area. A Section 104 process entails the community to apply for Mining Rights in terms of Section 22 of the MPRDA. As MPM is the current Mining Right holders to the property in question, such an application is not possible at present. The communities hold share in the mine through the ARM mining consortium and representatives through section 21 are elected to represent the interest of the communities and hence MPM would encourage people to talk through these structure to raise any relevant issues with regards to the community shares. Further engagement through means of a focus group meeting will take place during the development of the Environmental Management Programme.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Ms Maphoko Lucia Mabilo	18-Sep-17	<ol style="list-style-type: none"> As the traditional community under KgoSi Mpuru, we welcome the opening of the new mine. The site earmarked for the opening of the shaft require community approval. Approval is therefore granted by the community to utilise this area for the mine operation. We would like to know whether the mine will involve Section 21 of the community. Seeing that it is clear that this mine initiative is a joint venture between by MPM and Doornbosch, we would like to know whether the directors would be involved in the recruitment of employees. Since the mine is yet to be opened, are there any training programmes for the communities? 	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there is no new mine to be developed, nor new/additional job opportunities associated with this project. Modikwa Platinum Mine (MPM) is only including the approved Doornbosch Mining Right into the existing and approved MPM Mining Right by undertaking a Section 102 amendment process in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), and application in terms of the Regulations for listed activities in terms of the National Environmental Management Act, 1998 (Act No 106 of 1998) (NEMA). The Doornbosch Mining Right will be mined as an extension of the existing MPM South 2 Shaft Phase 1 operations. This extension is intended to supplement production until the Phase 2 of the South 2 Shaft project can be implemented. Without the extension the production capacity of the mine will not be able to be maintained according to the MPM's approved Mining Works Programme. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Dennis Mosoma Shabang	18-Sep-17	We would like to know how are we as communities going to benefit during the merger between Modikwa and Doornbosch mines? When these mines merge, it therefore implies that the SLP should be reviewed. There must be community representatives who would participate in the merger of the two mines, because Doornbosch falls under traditional communities and so is Modikwa Platinum Mine. How are you going to amalgamate them when they fall under different traditional communities?	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there are no mergers associated with this project. Modikwa Platinum Mine (MPM) is only including the approved Doornbosch Mining Right into the existing and approved MPM Mining Right by undertaking a Section 102 amendment process in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), and application in terms of the Regulations for listed activities in terms of the National Environmental Management Act, 1998 (Act No 106 of 1998) (NEMA). List the names of persons consulted in this column, and mark with an X where those who must be consulted were in fact consulted. Interested party	Mr Nkiseng Madingoane (Maa)	18-Sep-17	The environmental authorisation process requires face-to-face consultations instead of sending out documents. Sometimes documents don't provide sufficient information. We want you to come to the community, because the extension of the site requires a consensus with communities of Doornbosch and Mampudima in a general meeting. We would want to know how are we going to benefit. Section 102 Mine Act will not benefit anyone at all. Instead we want the application/implementation of section 104 so that communities could benefit in the extraction of other minerals such as chrome. We would like to talk to the mine representatives directly and not be provided with pamphlets. We cannot talk to/interrogate pamphlets. Currently Mampudima and Matimatjati have 17 per cent in terms of section 21; we want to know many percentage will they be entitled to when the mine expands. When the mine expands, the percentage/shares must also increase. The social labour plans and environmental management committees for both mines must also be reviewed. Public Participation First Act of 1993 / Consultation Act.	SRK thanks you for your comments as received during the project announcement phase of this project. In South Africa, distinction is made between surface land ownership and mineral ownership. The state is the custodian of the mineral resources of South Africa. The rights to access and mine the minerals beneath the surface is managed by the state through the Department of Mineral Regulation (DMR) through the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA). Interested party	Ms Agnes Nkgetheng Manyak	18-Sep-17	1. We welcome the opening of the mine; 2. We ask for the employment of local communities 3. We would also welcome the training of those people with no mining background/experience 4. After the provision of training to the communities, we request the absorption of the trained people. 5. We request bursaries for those who have completed matric	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there is no new mine to be developed, nor new/additional job opportunities associated with this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. Multi Task Training for novices are done and 40 opportunities are scheduled for 2017	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Ms Christina Mohlala	18-Sep-17	We welcome the good news about the expansion of Modikwa and Doornbosch. As the community, we would like to say that we need employment opportunities. I personally support development, and let there be jobs; we have suffered for a long time. I urge the mine to continue with consultations to resolve any misunderstandings and put things in proper perspective. We look forward to securing some piece jobs. When employment opportunities are created, we would no longer suffer. We would also have access to basic needs such as the improvement of roads. We also request the construction of bridges; we need Apollo lights. What is key to me is to find employment. I urge job-seekers to continue taking advantage of employment opportunities that may	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there is no new/additional job opportunities associated with this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required. Multi Task Training for novices are done and 40 opportunities are scheduled for 2017	Comment Addressed. Further stakeholder consultation to take place during the EMP phase.
Interested party	Mr Greatwell Seroke (EFF)	18-Sep-17	Corruption is rife at Modikwa. If things were done in a transparent manner, we would be employed at Modikwa. My comment is mainly about employment opportunities. I seek employment here at Modikwa. Is there any hope for employment? Please assist.	SRK thanks you for your comments as received during the project announcement phase of this project. SRK kindly wants to highlight the fact that there is no new/additional job opportunities associated with this project. Mining at Doornbosch will take place underground through the existing South 2 Shaft infrastructure, and no additional surface infrastructure or workforce will be required.	Finalised
Interested party	Mrs Kamogelo Dudu Matsipa	18-Sep-17	I reside at Maandagshoek at a village known as Swale. When I think about Modikwa Platinum Mine, I get disappointed. I am saying this because the mine is not assisting us with anything. When the mine initiates community projects, there is nothing to celebrate because whoever is appointed does shoddy work. Projects such as the construction of roads are but some of the poor workmanship. Contractors do shoddy work and take away the money. The other burning matter for me is the issue of unemployment. It is painful because there are busses which transport workers in our communities. What disappoints me is that the number of workers transported to and from work is just a drop in the ocean. Worse is that for the 02:00 shift, there is only one commuter who is transported to work. We are eight (8) in my family and none of us is working. We rely on the so-called social grant. We appeal to the mine to come to our rescue; we desperately need help. We suffer while there are busses moving up and down the communities day and night.	SRK thanks you for your comments as received during the project announcement phase of this project. Stakeholder engagement is undertaken throughout the authorisation process. Further engagement through means of a focus group meeting will take place during the development of the Environmental Management Programme. In terms of benefits to communities in the area, MPM has spent around R 100 million over a five-year period (2009-2013) on the key identified programs in the Social and Labour Plan (SLP) and an additional amount of approximately R76 million over between 2014 and 2018.
